DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claim(s) 1-20** are rejected under 35 U.S.C. 102(e) as being anticipated by Somerville et al. (US 2005/0047556 A1).

Regarding **claim(s) 1, 10 and 19**, Somerville discloses a method of licensing and managing media resources in a telecommunications system including a converged services platform (FIG. 1A and paragraph 0001), said method comprising the steps of: creating a central pool of storing resource points representing a licensed or authorization level of media resource service capability (paragraph 0018); and dynamically allocating portions of said central pool to one or more media resource cards (paragraph 0022).

Regarding **claim(s) 2 and 20**, Somerville discloses a method, further comprising the step of: storing in said central pool default and/or additional licensed resource points represented by a converged services platform (paragraph 0021).

Regarding **claim(s) 3 and 11**, Somerville discloses a method, wherein said allocating step allocates portions of said central pool to a particular media resource card for a specific media resource service (paragraph 0026).

Regarding **claim(s) 4 and 12**, Somerville discloses a method, further comprising the step of: providing redundancy in the event a media resource card becomes unavailable by allocating additional portions of said central pool to remaining available cards (paragraph 0027).

Regarding **claim(s) 5 and 13**, Somerville discloses a method, further comprising the step of: designating a specified number of resource points required to perform each media resource service available (paragraph 0026).

Regarding **claim(s) 6 and 14**, Somerville discloses a method, further comprising the step of: determining a number of resource points needed to perform an application by multiplying a number of required media resource services by their corresponding number of required resource points (paragraph 0026).

Regarding **claim(s) 7 and 15**, Somerville discloses a method, further comprising the step of: licensing additional resource points to a customer in the event that said resource points needed to perform an application are greater than said default resource points available (paragraph 0022).

Regarding **claim(s) 8**, Somerville discloses a method, further comprising the step of: notifying said customer that a license for additional resource points is needed in that event (paragraph 0029).

Regarding **claim(s) 9 and 16**, Somerville discloses a method, wherein said media resource service is selected from the group consisting of tone generation, tone detection, and recording/playback of Voice recorded announcements (paragraph 0022).

Regarding **claim(s) 17**, Somerville discloses a converged services platform, further comprising: cache memories programmed to cache voice recorded announcements and/or other announcements for playback (paragraph 0022).

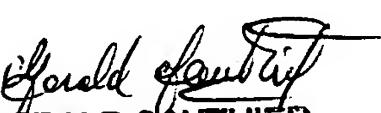

Regarding **claim(s) 18**, Somerville discloses a converged services platform, further comprising: an associated tile server coupled with a network interface and said processor, said file server storing said voice recorded announcements and other announcements (paragraph 0022).
